SS9. Have you had a chance to look through it?  

Y\ES…………………….1  
NO……………………2

**IF YES:** Great. I would like to briefly cover a few highlights as they relate to your study activities.  
**IF NO:** Okay that’s fine. I would like to briefly cover a few highlights as they relate to your study activities.

I’m going to review the different sections in the kit, starting with the green tabbed folder.

- In the green tabbed folder, you will find two copies of the study consent form, one is for your records and the other is for you to sign and give to the EMSI examiner. 
- The next is the blue tab: the blue tabbed folder contains a Life Events worksheet and Medications booklet for you to use during your phone interviews. It will be helpful for you to have your Life Events Worksheet for both parts of the interview. You won’t need the Medications booklet until the second part. These do not need to be returned with other materials. They are simply meant to be guides to use during the interviewing process. 
- In the purple tabbed folder, you’ll find three questionnaires: they are the Diet Questionnaire, Family History Questionnaire, and the Personal Care Products Questionnaire. We have included a pen and pencil, in the kit, for your use when filling these out. 
- The yellow tabbed folder, includes everything you need for collecting your toenails. 
- In the gray tabbed folder, you will find everything you need to collect the dust samples from your house.

Anytime before your visit, please complete the following: collect your toenails and dust samples; read and sign the consent forms in the green tabbed folder; and fill out the questionnaires in the purple tabbed folder.

- Lastly, you’ll find the orange tabbed folder, which contains a short questionnaire (24 Hour Questionnaire) and instructions for collecting your urine from when you first wake up for the day. Please plan on completing this questionnaire and collecting your urine on the day of your visit.

A company called EMSI will be doing your home visit. In the very back of the kit, you will see a red tabbed folder, everything in there is for the examiner to use. They will begin trying to contact you soon.

SS10. Do you have any (other) questions about these materials or the study requirements?  

Y\ES…………………1  
NO…………………2
SS11. Now, I’d like to schedule a time to do the first part of your phone interview. It is important, for scientific reasons, that we complete your phone interview and home visit within the next several weeks. So, as you pick a time for your phone interview, please keep this in mind.

CATI Part One Initial Intro

Before we get started, I want to remind you that this part of the telephone interview will take about one hour. Your participation is voluntary and all of the information we collect will be kept strictly confidential. If, for any reason, you would rather not answer a question, just tell me and we can go on to the next one.

IN1. Have you already had your blood drawn for this study?  
YES……………………1  
NO………………….2

<READ PREAMBLE TO IN2 AND ASK IN2 ONLY IN Intro for CATI part I>
The purpose of the next question is to help us keep in touch with you. This information will be kept separately from the data collected for this study and will be kept strictly confidential. Although providing this information is voluntary, if you choose not to answer, it may be more difficult for us to keep in contact with you over the course of the study.

IN2. What is your social security number?

Next, I would like to explain how this interview is structured. I am going to read you a set of questions exactly as they are worded. This way, everyone in the study will be answering the exact same questions. Sometimes you will answer in your own words. At other times, I will give you a list of choices and ask you to pick the one that fits best. If, at any time during the interview, you have any questions, please let me know.

<IF R IS TOTALLY BLIND: BEGIN CATI PART ONE. ALL OTHER RESPONDENTS: READ SCRIPT>
You should have received a life events worksheet with your Sister Study kit. I will need you to refer to this during the interview.

Environmental Section: Sun Exposure

These next questions ask about your time outdoors in daylight. This includes time spent in full sun as well as in the shade. When answering, please think about what you have usually done over the past five years. Remember that we are asking about all time spent outdoors including activities like gardening, walking, and biking, but also less physical activities such as relaxing. Please do not include time spent driving.

We are interested in how easy or difficult it was for you to get pregnant this time. This next question is about how many months in a row you had sexual intercourse without using any method of birth control before this pregnancy, whether or not you were trying to get pregnant. For our purposes, birth control includes condoms, diaphragms, pills, patches, injections, implants like Norplant, IUDs, the rhythm method, withdrawal, vasectomy, and tubal ligation.

Before this pregnancy, did you have sexual intercourse with a man at least once per month without using birth control for at least 12 months in a row? (Birth control includes condoms, diaphragms, pills, patches, injections, IUDs, the rhythm method, withdrawal, vasectomy, and tubal ligation.)

Aside from the time when it took a year or more for you to become pregnant, has there ever been a period of time lasting 12 months in a row or longer when you were having sexual intercourse with a man at least once per month without using birth control, yet you did not become pregnant? If you have gone through menopause, please think only about the time before menopause.

How old were you when this first happened?

Did you ever visit a doctor, clinic or hospital to seek help for you to become pregnant?

How old were you when you first visited a doctor to seek help for you to become pregnant?

Did you ever receive X-rays on your pelvic area to treat infertility?

Now I’d like to ask about fertility medications. These are drugs that are used to help women become pregnant, or
to stimulate the release of eggs for donation. Fertility drugs are often taken by injection, but may be taken in pill form or as a nasal spray.

**<BEGIN REPEATING RECORD – FERTILITY DRUGS>**
