

Sister Study Hodgkin Lymphoma Outcomes (any type)¹ and Characteristics: Data Release 7.2²

Characteristic	N	%
Total Cases	52	
Timing and Type³		
Baseline	30	57.7
Nodular sclerosis	4	7.7
Unknown ⁴	26	50.0
Unknown timing ⁵ – Unknown ⁶	6	11.5
Incident	16	30.8
Nodular sclerosis	3	5.8
Unknown ⁷	13	25.0
Incident	16	
Race/Ethnicity⁸		
Non-Hispanic White	11	68.8
Non-Hispanic Black	4	25.0
Hispanic	1	6.3
Other	0	0.0
Age (in years) at Diagnosis⁹		
Under 50	4	25.0
50-64	3	18.8
65 and older	9	56.3
Diagnosis Confirmation¹⁰		
Medical	5	31.3
NDI Plus or death certificate only	3	18.8
None	8	50.0

Characteristic	N	%
Incident – Medically Confirmed		
Stage at Diagnosis¹¹		
I	0	0.0
II	0	0.0
III	1	50.0
IV	1	50.0
Missing, cannot stage	3	

¹ Cancer events are defined by the following ICD10 cancer codes: Hodgkin lymphoma (C81). Other ICD10 cancer codes that may be used when Hodgkin's lymphoma is one of the favored primaries: unspecified lymphoma (C85.90), invasive lymphoid, hematopoietic, and related tissue (C96.9), invasive unspecified site (C80).

² Data release 7.2 includes outcomes from follow-up phases that closed on or before 9/15/2017

³ Further details regarding nodal or extranodal site(s) are available upon request but will generally only be available for cases with medical confirmation.

⁴ Unknown generally includes Hodgkin lymphoma - not specified [n=23] but also includes diagnoses where it is uncertain if Hodgkin or non-Hodgkin lymphoma [n=3].

⁵ Unknown timing represents cases that are unknown if diagnosis at or prior to baseline vs. post-baseline (i.e. incident case)

⁶ Unknown generally includes Hodgkin lymphoma - not specified [n=5] but also includes diagnoses where it is uncertain if Hodgkin or non-Hodgkin lymphoma [n=1].

⁷ Unknown generally includes Hodgkin lymphoma - not specified [n=12] but also includes diagnoses where it is uncertain if Hodgkin or non-Hodgkin lymphoma [n=1].

⁸ Race/ethnicity: precedence given to Hispanic ethnicity first, then Black race, then other race, then White race

⁹ For those missing age at diagnosis [n=2], age was imputed as the midpoint of the range of plausible ages at diagnosis

¹⁰ Medical confirmation of reported Hodgkin lymphoma is from medical documentation including clinical reports; National Death Index (NDI) Plus or death certificate confirmation is specific to cases that do not have medical confirmation

¹¹ Stage at diagnosis is only available for cases with medical confirmation, but available medical documentation was generally not sufficient for staging.
